

HWA2

Range of chillers and reversible heat pumps
with scroll compressors and R290 Gas

HWA2

Range of reversible chillers and heat pumps with scroll compressors and R290 Gas

- **A unique solution for heating, cooling, and hot water production** with guaranteed performance all year round.
- Sustainability, technology, and reliability make this range adaptable for both commercial and industrial applications, thanks to the use of fixed-speed scroll compressor technology.
- The HWA2 range is designed to achieve water temperatures suitable for a wide variety of uses, both for comfort and domestic hot water production.
- **78°C Hot water**
- The range is available in **8 sizes**, with different power ratings available in both cooling-only and reversible heat pump versions.
- **Dual range: chillers and reversible heat pumps.**
HWA2-A represents the series of chillers suitable for both comfort and industrial applications, thanks to the BT version, which allows for operating fluid temperatures as low as -8°C.
HWA2-AH, with its wide operating range and high maximum water temperature, can easily be used both for new installations and for replacing existing systems.
- **3 different frames to meet every need**
The 8 different sizes of the HWA2 require different configurations, which is why 3 new frames have been designed to accommodate all the components necessary for their proper operation.
- **Wide hydraulic configurability**
Each size of the HWA2 range can be configured with various circulation pump models, which can be paired, upon request, with the corresponding storage tank. Furthermore, the hydraulic connections to the distribution system can be easily oriented, optimizing the connection with it.

HWA2

0270-0280-0290

- 2 scroll compressors
- single refrigerant circuit
- optional: single pump AC, double pump AC, single pump inverter
- optional: integrated tank
- standard EC fans (A version)
- optional: EC fans (AH version)
- optional: SL or SSL version

HWA2

04110-04120

- 4 scroll compressors
- double refrigerant circuit
- optional: single pump AC, double pump AC, single pump inverter
- optional: integrated tank
- standard EC fans (A version)
- optional: EC fans (AH version)
- optional: SL or SSL version

HWA2

04140-04155-04170

- 4 scroll compressors
- double refrigerant circuit
- optional: single pump AC, double pump AC, single pump inverter
- optional: integrated tank
- standard EC fans (A version)
- optional: EC fans (AH version)
- optional: SL or SSL version

(1) Cooling: outdoor air temperature 35°C; in/out water temperature 12/7°C.

(2) Cooling: outdoor air temperature 35°C; in/out water temperature 23/18°C.

(3) Heating: outdoor air temperature 7°C b.s. 6°C b.u.; in/out water temperature 30/35°C.

(5) Cooling: low temperature, variable output, fixed flow.

(6) Heating: average climatic conditions; T_{biv}=-4°C; low temperature, variable output, constant flow.

(8) The volume indicated refers to the total needed, the designer must satisfy this

considering the quantity already present inside the unit depending on the hydronic kit chosen (please check this value in the data sheet).

(10) Sound pressure: value calculated from the sound power level in condition (9) using the standard UNI EN ISO 3744:2010.

(11) Heating: outdoor air temperature 7 °C b.s. 6 °C b.u.; in/out water temperature 55/65 °C
